CONSTIPATION

And Sour Stomach Caused This Lady Much Suffering. Black-Draught Relieved.

Meadorsville, Ky.-Mrs. Pearl Pat. rick, of this place, writes: "I was very constipated. I had sour stomach and was so uncomfortable. I went to the doctor. He gave me some pills. They weakened me and seemed to tear up my digestion. They would gripe me and afterwards it seemed I was more constipated than before.

I heard of Black-Draught and desided to try it. I found it just what I eccded. It was an easy laxative, and not bad to swallow. My digestion soon improved. I got well of the sour stomsch, my bowels soon seemed normal, no more griping, and I would take a dose now and then, and was in good shape.

I cannot may too much for Black. Draught for it is the finest laxative

Thedford's Black-Draught has for many years been found of great value in the treatment of stomach, liver and bowel troubles. Easy to take, gentle and reliable in its action, leaving no bad after-effects, it has won the praise of thousands of people who have used it.

IN MEMORIAM

Madison county loses one more of Engineer. Bids should be filed its loval sisters, when last Sunday with the undersigned or with morning the death angel visited the Judge W. K. Price. The right home of Mrs. Elzie-Pigg and took one reserved to reject any or all bids. of his precious jewels, a lovely wife and mother. She was well known all County Road Engineer over Madison county and the adjoining counties and was beloved by all who knew her. She possessed a most beautiful christian character and lived it perfectly, and though she has been a cripple all her life as the result of a stroke of paralysis twelve years ago, and has been in a pitiful condition since, stil she bore her afflication patiently, - always trusting in the the Lord's strength. She gave herself to Christ in her early childhood spent Monday in Richmond. and lived a true and consistent chrisher and forever be her friend. She terest of the Lexington Coca Cola stone the 11th of March. had nothing too good for her neighbor Company. deeds and arts o fcharity, and in her to the Pattie A. Clay Infirmary from rard county for \$125. last words she said that she didn't Clark county the middle of the week Friends will be sorry to hear that fear to die; she was ready to go; all she cared to go for was that she was needed in her home, for she was leaving her two little girls that needed a

mother's care. She had ever care that human aid could give to restore her back to health. Dr. Bailey of Valley View was constantly by her bedside, also Dr. D. J. Williams and Dr. Sandlin of Richmond, were called and consulted. The kind neighbors stood around her bedside both day and nigh in numbers, but nothing could be done for God had called her and she must go, and at 2 o'clock anddshrdiuuuuuu go, and at 2 o'clock and 15 minutes there was an angel in heaven lifted its great white wings, and wafted her spirit home.

Mrs. Pigg is survived by a husband, two sons, Vernon Pigg, 18, and Jim Pigg 16, two daughters, Elizabeth 12, and Edna 6, another Mrs. G. T. Butler of Madison county, three brothers, Mr. Walker Butler, of Clark county, Mr. David Butler, of Winchester, Mr. Tom Butler, of this county, and three sisters, Mrs. J. C. Bowman of Richmond, Mrs. Vernon Davis, of Lexington and Miss Ollie Butler of this county. Funeral services were conducted by Rev. D. H. Matherly and interment in

Oh, world, cruel world, what is there here for, sickness and strife, and an unhappy life, pains and misery.

Oh, heaven bountiful heaven, what 1s there for me, a city that is full of peace and rest and life eternal .-Contributed.

Sales Costs and List Prices—

The man selling the six thousand dollar truck must be a good salesman. His hardest job is to justify his price to the prospective buyer. He sells comparatively few trucks through a year. His commission per truck must be high. The list price of the six thousand dollar truck includes that sales cost. Also it includes the high overhead resulting from low production. What proportion of the price of the six thousand dollar truck is margin? What proportion is value?

Bethlehem Motor Trucks are neither overbuilt to justify a price nor underbuilt to meet a price. They represent the middle ground. That point where quality and price combine in greatest value. Bethlehem Motor Trucks are ready to be judged as motor trucks should be judged—on their ability to transport and the cost of that transportation. Buy your Motor Truck on Facts.

CHEAPEST STORE IN RICHMOND All Orders Delivered Promptly Call phone 903 and get my money saving prices. Highest Prices Paid For Country Produce

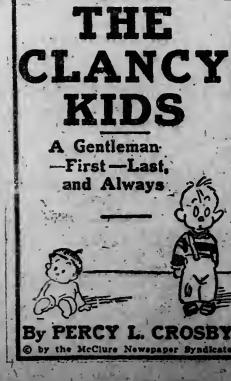

Mr. Farmer

Every time you have any poultry, eggs or a hide to sell call me at Phone No. 70 before selling, and get my prices. You will find that my prices are always as much as that of others and that most of the time they are higher. The fact that I buy at least two-thirds of all the poultry and eggs that farmers of Madison county bring to Richmond proves my statement that I always pay the top price.

Bring your produce to me at Wides' old stand on Irvine street, next door to the Union Supply Company.

SAFEST WAY FOR STARTING MOTOR

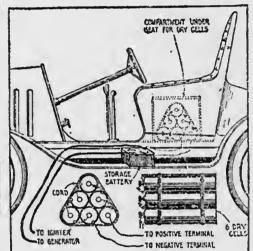

Ignition System Sometimes Gives Trouble, Even in Most Expensive Cars.

Six Dry Cells, Securely Tied Together in Triangle Shape, May Be Stored In Compartment Under Seat and Out of Way.

At least 50 per cent of the modern automobiles use battery ignition. As this system sometimes gives trouble, even in the most expensive cars, I devised a method for producing an emergency current as shown in the illustration. This consists of six dry cells seenrely tied together in a triangle shape and wired in series with a four-foot length of well-insulated copper wire attached to each of the negative and positive terminals. These wires are used to make connections with the storage battery terminals for starting the motor; then they are discon-

Batteries Last Long.

The batteries will last a long time for this emergency work. If the storage battery gives too much trouble, remove the filling caps and make sure

A Set of Dry Batteries Placed Under the Seat to Aid in Starting the Au-

the top of the lead plates. Should the level be below this point, add enough distilled water to make up the deficiency. Keep all the battery and wire arrately with pure water and castile a sharp knife about once a month, and make sure that there is no short cir- the body. cuit in the dashboard switches and that no hattery wire or other wire is chafing against any metal to produce a short circuit. In this way a battery may be kept at its highest efficiency.-P. P. Avery, in Popular Science

TROUBLE FOUND IN BATTERY

Fault Will Very Possibly Be Found in Corrosion of Terminals-Current Retarded.

If trouble develops in the battery which upon examination is found to be up to normal and yet is not delig- the many inferior grades on the marering enough current to furnish lights nor spark enough to ignite the fuel, the basic fault will very possibly be found in corrosion of the terminals. When the terminals are covered with a hard green deposit no current can flow Sometimes this deposit is so hard that it takes a chisel to remove it.

CAR KEPT CLEAN

Some Excellent Suggestions Given on How to Take Proper Care of "Finish."

EMERGENCY BATTERY USEFUL FREQUENT WASHING IS BEST

Varnish of New. Car Is Benefited by Use of Clear Cold Water-Clean Leather Upholstery With Piece of Woolen Cloth.

"The engine of a car can be mistreated frequently before it begins to complain, but the finish can be mistreated once or twice—then there is no finish left to mistreat," says William H. Stewart, president of the Stewart Automobile school.

"The lack of washing and the essential, knowledge of not knowing how to wash a car will go further towards ruining the appearance than any other thing. The varnish of a new car is benefited and hardened by washing with clear cold water, but mud that is allowed to dry upon the body takes the oil from the vnrnish and leaves the finish mottled and streaky. Dirt is not the only enemy, for gases from the garage and even the atmosphere of some towns attack the finlsh of the car that is not frequently washed. First Remove Dust.

"Degln by cleaning the top. Take a good stiff brush and remove the dust. then either sponge or use a soft cloth with warm water and pure soap. A chamois kept especially for the purpose will tend to hasten the crying and the top must not be folded until it is flioroughly dry.

"The upholstery, if of cloth, is best cleaned by sponging with water containing a little salt and alcohol. If of leather a woolen cloth dipped in clear water to which a few drops of aimnonia has been added is best.

"In cleaning the body, be sure to redust and also loosen the mind. In cases where the car is very dirty it is best to do this and then let It stand for a few minutes before going over it that the liquid is one-half inch above again with the hose. Then take a soft sponge and follow the lose over the body. If certain portions are grease spotted these should be washed septerminals bright by scraping them with soap, but except in this one instance soap of any kind should be avoided on

"The road oil and grease that collect on the running gear require different methods of removal and also other tools. Special brushes will get at the grease in inaccessible corners. In the case of the wheel hubs, care should be asea to prevent water and grlt work ing into the bearings. The chamois used on the body should never be used on the running gear, a separate chaacis being kept for this one purpose A heavy accumulation should never be taken off by dusting. It should be made to flow off with the hose. If you wish to use a body pollsh beware of ket. If any, you should use the very best grade obtainable."

A HOT SPOT Chalmers. does these—and more

IT saves wear on tires. It saves wear on all working parts.

It relieves vibration.

It increases mileage on gas.\ It starts quickly on a cold day.

It runs cool on a hot day.

It reduces engine knocks. It reduces carbon deposits.

It keeps spark plugs clean for a long time.

It gets more power out of gas.

It accelerates faster.

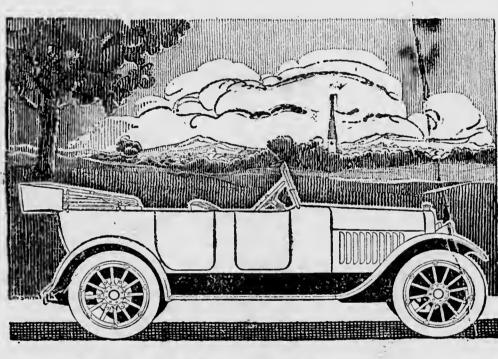

It rides more smoothly.

It is absent of all carburetor and engine noises.

All because of Hot Spot and Ram's-horn. Hot Spot "cracks up" the raw gas and gets it in excellent condition for combustion, like a fine chef preparing an omelet, while Ram's-horn tosses it gently but with amazing speed into the cylinders.

You simply get more for your money every time you fill up the gasoline tank of a Hot Spot Chalmers.

It is fast being regarded as one of the few great cars of the world.

KEEP WATCH ON GASOLINE PUMP

Pointers Given to Motorists by National Automobile Chamber of Commerce

CONSERVE FUEL AND MONEY

Twelve Excellent Rules Formulated for Benefit of Owners-Short Delivery is Likely if Details Are Overiooked.

Points for motorists to remember when purchasing gasoline have been formulated by the National Automobile Chamber of Commerce, with a view to conserving gas and saving money for the car owners. He is advised as follows:

1. Urge your dealer to make a daily test of the accuracy of his gasoline measuring pump with a standard five-

2. On pumps making one-gallon dclivery, see that the pump operator makes a full stroke and that the piston If not attended to promptly, the travels its full length.

Watch Indicating Device. 3. Watch the counter or indicating device on all pumps provided there-

4. See that the operator drains*the

delivery hose. 5. On pumps provided with graduated glass-cylinders, see that the gaso-

line reaches the proper graduation. 6. Beware of the filling stations where the delivery is outside and the

pump inside the building. 7. Operators should willingly test pumps in the presence of the autoist with the five-gallon standard measure scaled by the local inspector of weights and measures.

8. Short delivery gasoline is sometimes caused by leaks in the supply line to the pump. This condition causes the pump to deliver air instead of gasoline and can be detected by the sputtering sound.

9. If the gasoline is low in the supply tank, short delivery is likely to result. This can be detected by the irregular flow of gasoline and the sputtering sound. Such a condition is frequentiy encountered where portable filling tanks are used.

First Delivery Short.

10. The first delivery made by pump after it has been standing idle for some time is invariably short. This is caused by the gasoline already in the measuring chamber leaking back into the dealer's supply tank through a leaky check valve.

11. View with suspicion a gasoline delivery hose attached to a well in the curb. It is impossible to properly drain a hose so installed, and adequate measure cannot be obtained unless this is

12. In rare cases pumps may be deiiberately manipulated to deliver short amounts through the changing of measuring adjustments.

ARE YOU A "GOWAG?"

The suggestion is made that every motorist become a "gowag." The word is coincd to remind the motorist of the five things he should always watch if he would aveid trouble in keeping his car running. A "gowag" lives up to his name by remembering:

G stands for gasoline; always have a sufficient fuel supply. O for oil; plenty of it and the right kind.

W for water; even motors have a terrible thirst.

A for air; tires must be inflated to the correct pressure. G (final) for grease; give

those grease cups the turns required. And don't forget the

Putting His Luck to the Test. In old Japan, when a man wanted to get a wife, he went to the house of he went away disconsolate.

CAREFUL DRIVING IS **DUTY OF MOTORISTS**

Driver Should Always Be Vigilant to Avoid Accident.

Maintenance of Car in Good Condition Is Next Consideration and Frequent Inspection, Especially of Wheels, is Needful.

Prevention of accident is the everpresent duty of all motorists. The driver should always be vigilant to prevent disaster. Careful driving is, of course, the first consideration, the idea being to always avoid risk.

Next comes the maintenance of the car in good condition. This requires frequent inspection, especially of the wheels. Wheel trouble is too frequently overlooked and the condition of the spokes neglected. Loose spokes make the car unsafe in sudden emergencies, with terrible results in some

The first indication of loose spokes are squeaks and paint cracks where the spokes join at the hub or rib. The cracks show that the wood has shrunk. spokes work looser, tili the stability of the wheel is seriously impaired. Then, at a critical moment, the wheel

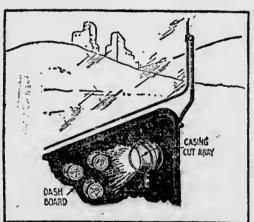

The motorist should always take time to see that the wheels of his car are in good running order, for stiil other reasons. It is much easier and less expensive to correct defects in their early stages than later on. Again, unsound and insecure wheels cause all other parts of the car to deteriorate more rapidly than they would otherwise. If the wheels do not run true the tires soon wear out, the chassis is warped out of shape and the foundation on which the motor rests weakens so that the mechanism works under unnecessary and ruinous strain.

Neglected wheels soon reduce a car to a condition of useless junk, whereas a little care as occasion demands adds greatly to its life, pleasure and security.

GOOD DASHBOARD LIGHTING

Cutting Away Section of Lamp Casing Will Give Sufficient Illumination for All Needs.

Many cars are equipped with the socalled flush side light, the lens being flush with the outside, and the back of the lamp extending in on the dash. By simply cutting away a section of

A. Cut-Out on the Flush Side Light to liluminate the Dash.

the lamp casing, as shown, part of the light will follow the dash, thereby illuminating it sufficiently for all needs. -Thomas W. Benson, in Popular Science Monthly.

AUTOMOBILE

Proper lubrication is just as much a factor in the feeling of safety ln motoring as new tires or a recently overhauled motor.

As you approach a stop coasting, or as you coast around corners, be sure to throttle down, to prevent engine from racing. This saves the gasoline that would otherwise be wasted.

Imitation of Preclous Stones. The opal is more difficult to imitate the girl whom he fancied and threw than is the diamond. But from artifione of his shoes into the yard. If cial corundum, stained with chrome the shoe was picked up and taken in- alum, real rubies can be made, and side by her, he looked for a favorable very cheaply. If the coloring agent is issue; but if it were cast out again, titanium oxide, the product becomes a genuine artificial sapphire.

When Your Car Needs To Be Repaired

bring it to us. Our mechanics are competant and do not work first on one car, then an other and charge you for time used on both cars.

AUTOMOBILE & GOSSIP

Owners of cars fitted with wire wheels should give these parts a weekiy inspection for loose spokes.

The constant use of hard or dirty water for cooling purposes will result in the clogging of the radiator.

Car owners should get into the habit of using belt dressing for the clutch le ther to swell it and act as a remedy for slippage.

When replacing tire tubes it is essential that tale or French chalk should be thoroughly distributed over the inside of the casing.

THE CAR OF ECONOMY

Economy is a relative term. Many people confuse economy with cheapness. But to the thinking man or woman there is little chance for such confusion of ideas.

For economy is not cheapness. The things which cost least are often most wasteful. And wastefulness, is never economical.

The Grant Six is an economical car. It is a high grade motor car. It delivers exactly what buyers of its type want. It brings you beauty from which springs a feeling of pride in ownership. It brings you satisfactory performance, quick acceleration, marked flexibility, hill climbing ability, ample power.

It brings you riding comfort. It brings you dependability founded on correct engineering and high grade construction. It brings you freedom from worry because of its substantial construction. It brings you freedom from costly repair bills.

Its simple, accessible mechan-ism requires little time or effort to look after properly. Its makers

have incorporated in the Grant Six design every known feature that will contribute to your comfort, pleasure and permanent satisfaction.

Its light weight insures low tire cost, low gasoline cost, and its great strength insures long life.

Therefore, because it brings you what you want at an honest, fair price, because it brings you real value for every cent of your investment, it is a truly economical

On Doing Right.

I think it is better to do right, even if we suffer in so doing, than to incur the reproach of our consciences and posterity.-Robert E. Lee.

TROUBLES of the BANKER

Ask any Banker whence come the largest number of his troubles and he will answer: "The Collection Department."

Many people do not realize that the Bank cannot hold drafts and other collections for the convenience of the payee. The truth is the Bank is legally bound by the instructions which accompany collections and may, therefore, exercise neither discretion or favor. The Banker is FORCED to be prompt-may he not expect you to exert every effort to be prompt too?

State Bank & Trust Co.

Wanted

Pounds of Poultry

Now is the time to sell your surplus stock of chickens while the price is high. We will pay

HENS AND SPRINGERS 26c AND 15c FOR ROOSTERS

and go to your house with a truck and get them if you have as many as 50 head Get busy and sell them now as the price may go lower at any time.

Would You Lose If Your Property **Burned Today?**

The destruction of that \$5,000 home you built a few years ago would lose to you the original cost, plus another \$5,000. For it costs \$10,000 now to build the \$5,000 home of 1914.

Likewise the loss of today of the business property that cost \$50,000 before Germany went mad ,would be \$100,000 probably \$100,000 would not replace it.
